

# The Alan Turing Institute

---

## *The Turing Way* **Practitioners Hub**

Programme Overview: March 2023

*Malvika Sharan, Alexandra Araujo Alvarez*

# The Alan Turing Institute

UK's National Institute for Data Science and AI

- Advance world-class research and apply it to national and global challenges
- Build skills for the future
- Drive an informed public conversation

# Challenges

Advance data science and artificial intelligence to...

# Tools, Practices and Systems

- Trustworthy systems
- Transparent reporting
- Inclusive interoperable design
- Ethical integrity
- Respectful co-creation
- Leadership in open research

**The  
Alan Turing  
Institute**

Partners and  
collaborating  
projects

**Tools,  
Practices and  
Systems**

Research  
communities  
at national &  
global scale

## The Turing Way

Open source, open collaboration  
and community-driven handbook  
to reproducible, ethical and  
collaborative data science.

*Bidirectional flow of knowledge, resources & evidence*

Research outputs

Strategic and  
technical support

Open  
Infrastructure

# The Turing Way: Book on Reproducibility

Kirstie Whitaker

Director: Tools,  
Practices & Systems  
Programme (TPS)

***“We need to share the responsibility for open and reproducible science.***

*That along with good collaboration, communication and ethics should be seen as fundamental scientific methods.”*

*The Turing Way* is a lightly opinionated guide to reproducible data science.

Our goal is to provide all the information that researchers need at the start of their projects to ensure that they are easy to reproduce at the end.

This also means making sure PhD students, postdocs, PIs, and funding teams know which parts of the “responsibility of reproducibility” they can affect, and what they should do to nudge data science to being more efficient, effective, and understandable.

# The Turing Way

An Open Source guide on Data Science.

*We involve and supports a **diverse community** to make research **reproducible, ethical, open and inclusive** for everyone.*

# Reproducibility

		Data	
		Same	Different
Analysis	Same	Reproducible	Replicable
	Different	Robust	Generalisable

## Guide for Reproducible Research

- Guide for Communication ▼
- Guide for Collaboration ▼
- Guide for Ethical Research ▼
- Community Handbook ▼
- Afterword ▼

# The Turing Way Guides

*Reproducibility*

*Project Design*

*Communication*

*Collaboration*

*Ethical Research*

*Community Handbook*

Thanks to our community of contributors & users!

# Project Growth & Recognitions

- 4+ years, **>260 Chapters**, community resources
- **425+ contributors, 3500+ monthly users** - supported by 20+ core members (governance)
- **2 awards** and engagement with 25+ organisations
- Replication/extension by **3 Turing & 6+ external projects** (e.g. ONS, UCL, Uni Oxford, LIBER: Association of European Research Libraries)

# Qualitative/notable impacts

---

Resources are being used by learners, educators, community builders, policy makers and researchers globally

- NASA - Transform to Open Science - 5 years Mission for capacity building
- Recommended in Goldacre Review for modern open working into health data
- NASA OpenCore, CodeRefinery, Library Carpentries training materials
- Reproducibility of scientific results in the EU 2020 report
- An Emerging Technology Charter by Mayor of London (2021 policy)
- Innovation Scholars: UKRI grant 2020 (funding call)
- Cited by 40+ peer-reviewed articles & 100+ online publications

## A Book

## A Community

## An Open Source Project

## A Culture of Collaboration

# Extending the impact through 'Practitioners Hub'

A forum for **cross-sector engagement**, knowledge exchange and strategic collaboration **with organisations** across academia, research, engineering systems, government, and healthcare **leading data science initiatives**.

# The Turing Way Practitioners Hub

Systematic approach for **building a shared understanding** of open science, reproducibility, accessibility and research ethics to **enhance quality, rigour and integrity in data science and AI**.

---

# Practitioners Hub: Scale & Scope

Practitioners Hub **Inaugural Cohort May 2023 - October 2023**

Funded by:

- Phase 1: Ecosystem Leadership Programme (UKRI funded)
- Phase 2 and 3: BridgeAI\* and additional fundraising

Project Phases:

Phase 1 (Oct 22 - Apr 23)	Scoping and onboarding the partners
Phase 2 (May 23 - Oct 23)	Custom resource, activity and engagement
<b>Phase 3 (Nov 23 - Dec 26)</b>	Future cohorts, scaling and sustainability

*\*BridgeAI (**Innovate UK KTN** ([ktn-uk.org](https://ktn-uk.org)) aims to help businesses in high growth sectors such as agriculture, construction, creative and transport industries, to harness the power of AI and unlock their full potential. The Practitioner Hub will extend the impact of The Turing Way community approaches and resources those sectors.*

# Practitioner Hub's "Expert in Residence"

- Recognising a champion for open science and reproducibility from each partnering organisation
- Support for 0.2 FTE for 6 months
- Join the cohort of Experts from different partnering organisations
- Co-developer of case studies highlighting impacts of best practices in their org/sector
- Serve as the primary contact

# Practitioners Hub's Overarching Goals

*Accelerating the adoption of best practices in the partnering organisations*

- Co-creation of case studies highlighting the **impacts of data science best practice**.
- Embed **community practices** to enable knowledge exchange and team science
- Foster a network of '**Experts in Residence**'

# Practitioners Hub Team & Roles

---

**Kirstie Whitaker**

TPS Programme Director,  
The Turing Way Lead

**Malvika Sharan**

TPS Senior Researcher,  
The Turing Way co-lead

**To be Recruited**

Senior Research Associate

**Jennifer Ding**

TPS Senior Researcher -  
Research Application Manager

**Alexandra  
Araujo Alvarez**

Research Project Manager

**Shane Conneely**

Partnership Development  
Lead - TPS

---

# Practitioners Hub: 1st Half of the Cohort

## Month 1 (May)

- Onboarding meeting with partners & cohort members represented by Experts (in Residence).
- Planning case studies with experts.
- Building roadmap and customised engagement and skill exchange plan.

## Month 3 (July)

- First drafts of case studies with experts.
- Connecting cohort with the Turing, BridgeAI, open science resources & good practices across sectors.
- Working with experts in planning skill development & training opportunities for partner organisations.

## Month 2 (June)

- Working with the Experts to capture impact of best practices in respective organisations and their sectors.
- Stakeholder and skill mapping with each partners.
- Facilitated planning of knowledge share (Fireside Chat, Book Dash or customised events) among cohort members.

# Practitioners Hub: 2nd Half of the Cohort + future collaboration

## Month 4

- Project-specific engagement from organisation
- Building and beginning the customised consulting, support and collaborative research
- Beginning the implementation of customised support (community, research application, open source, other shared priorities?)

## Future

- Institutional investment in funding the engagement of Experts in Resident.
- Future collaboration in the Turing, BridgeAI and/or the Turing Institute.
- Document and report the collaborative work openly.

## Month 5-6

- Continue the implementation of customised support (community, research application, open source, other shared priorities?)
- Assess organisational intent to continue engagement beyond the cohort.

# Connect beyond the Practitioners Hub

## Collaboration Cafes

- 1<sup>st</sup> & 3<sup>rd</sup> Wednesdays (14:00 UTC)
- **Coworking Calls**
  - Mondays (10:00 UTC)
- **Fireside Chats**
  - Monthly on last Fridays
